STANDARD PRICING SCHEDULE R-DG
RESIDENTIAL SERVICE WITH DISTRIBUTED GENERATION

AVAILABILITY

Available for residential electric service for Customers with conforming distributed generation systems. The service must be utilized for residential purposes in individually owned single and two family dwellings. Single phase, 120/240 volt service shall be supplied through one point of delivery and measured through one meter which will measure kWh Delivered by Edmond Electric and kWh Received from the Customer. No commercial, resale, breakdown, auxiliary, or supplementary service permitted.

The Customer's distributed generating installation shall not exceed 10 kW. This requirement may be reviewed on a case by case basis by the Director of Edmond Electric or his/her designee.

The Customer must be in good standing with Edmond Utilities, who owns and receives electric service at the Premise where the permitted and conforming distributed generation system is installed and operated and have a current "Agreement for the Interconnection of a Customer Owned Distributed Generation System" with the City of Edmond.

Under the terms of Edmond Electric's wholesale power supply contract, Edmond can allow a maximum cumulative distributed generation capacity of one percent (1%) of the Edmond's single hour peak load to be installed on its electric distribution system. This capacity is allocated on a first-come, first-served basis. If the cumulative generating capacity of solar systems reaches the maximum 1% of Edmond's single hour peak load, Edmond Electric cannot not allow any new systems to be interconnected to our distribution system.

CUSTOMER CHARGE

\$30.00 per meter per month.
